SUMMARY

Full-stack developer focused on building scalable **MERN** applications with authentication systems, **REST APIs**, **RBAC**, and backend architecture. Experienced in implementing reservation conflict prevention, production-style admin dashboards, and secure user management systems.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, **REST APIs**, **JWT**, **RBAC**
Databases/Tools: MongoDB, PostgreSQL, Git, GitHub, Postman, Insomnia
Concepts: OOP, MVC Architecture, Authentication & Authorization, Async Programming

EXPERIENCE

Royal Technosoft Pvt. Ltd. Jan 2026 – Apr 2026
MERN Stack Intern Ahmedabad, Gujarat

- Developed multi-role rental platform supporting Guest, Host, and Admin workflows with **RBAC** and role-specific dashboards
- Designed and implemented **REST APIs** for authentication, listings, and user management using **Node.js**, **Express.js**, and **MongoDB** with optimized query patterns
- Engineered conflict-free reservation system with availability validation and date overlap prevention logic
- Implemented **JWT**-based authentication with session management, protected route middleware, and role-based authorization
- Built responsive UI components using **React.js** and **Tailwind CSS** with reusable component architecture
- Integrated **Cloudinary** for image upload and management with secure file handling

PROJECTS

Stayora Rental Platform GitHub | Live Demo MERN Stack

- Architected multi-role rental platform with complete reservation lifecycle management and role-based dashboards for Guests, Hosts, and Admins
- Engineered conflict-free reservation logic with real-time availability validation and date overlap detection
- Developed chat system enabling communication between active reservation participants with message persistence
- Built centralized admin dashboard with moderation tools, user management, and dispute resolution workflows

Scatch E-Commerce Platform GitHub MERN Stack

- Developed full-stack e-commerce platform with user and admin roles and complete checkout workflows
- Implemented **JWT Authentication** with protected routes and role-based access control
- Built cart management system with real-time price calculations and inventory validation
- Designed product filtering, search, and pagination for improved browsing experience
- Created **REST APIs** for authentication, product catalog, order processing, and user operations

EDUCATION

Government Engineering College, Modasa June 2026
B.E. in Computer Engineering, CGPA: 7.22/10 Modasa, Gujarat
